Time To Fall Down

David Sneddon

Hey yay-ay.... Got a face like thunder You're looking like the world came down on you You're not like any other I wish you never do There is a silver lining for your cloud But take one step at a time You can turn it all around... So hold on Go back to the start Running in circles Let things fall apart Think that it's time to fall down Oh yay... Think that it's time to fall down So you've taken a fall You're not he first to get back on your wall And deal it again Just struggle your hand in You'll take the message you've learned to someone new Then somebody can lean on you And when the tables have turned So hold on Let things fall apart Go back to the start Running in circles Think that it's time to fall down Think that it's time to fall down Down... So hold on Dow-ow-ow-ow-owwwn... Go back to the start Let things fall apart Running in circles Think that it's time... Think that it's time to fall down So hold on Go back to the start Let things fall apart... Running in circles Think that it's time to fall down Think that it's time to fall down
