

# Underneath The Night Sky

## Young Love

Loud screams, fighting words, awful things were said  
You might not be able to take back  
She puts her hands on his face  
And tells him get out, get out Just leave, she pleads  
He can't believe what he's done  
As he's walking down the street  
The night keeps warning him to turn around Underneath the night sky take flight  
Underneath the night sky she cries  
Underneath the night sky one last time  
You know where I'm going Underneath the night sky  
Remembering the reasons why  
Underneath the night sky  
I'll fall for you tonight again On his way to familiar arms  
Someone who will know him, the girl who understands  
Stops dead in his tracks to see  
It's too much too give up, not too late for apologies Turns down the wrong street, give me all your money  
Should know better than to be here alone  
Tries to run, doesn't feel like a fight  
She could hear the shots ring out from home Underneath the night sky take flight  
Underneath the night sky she cries  
Underneath the night sky one last time  
You know where I'm going Underneath the night sky  
Remembering the reasons why  
Underneath the night sky  
I'll fall for you tonight again Don't forget to hold her tight  
Everything can change so fast Underneath the night sky take flight  
Underneath the night sky she cries  
Underneath the night sky one last time  
You know where I'm going Underneath the night sky  
Remembering the reasons why  
Underneath the night sky  
I'll fall for you tonight again Don't forget to hold her tight  
Everything can change so fast, no, no, no  
Don't forget to hold her tight  
Everything can change so fast
