

Seven

James

Blow me away
Was that love you declared
Only a word
Love can mean anything I understand the world, we're living in
Oceans apart
What's that view from your wave
Beautiful craft
Weather and change I understand the world, we're living in
Love can mean anything God made love to me
Soothed away my gravity
Made me a pair of angel's wings
Clear vision and some magic things God is love to me
Thank you for those things I understand the world, we're living in
Love can mean anything Darling, I'm open
Unguarded, unbroken Now we've done our time
We can drift away
Like the heavy cloud
With the weight of rain I understand the world, we're living in
Love can mean anything I understand the world, we're living in
Love can change anything I understand the world, we're living in
Love can mean anything I understand the world, we're living in
Love can change anything
