

Up, Down, All Around

Elliott Yamin

Woke up this morning
Needed to talk
Pick up the phone and started to call
That's when It hit me that you were gone So many questions
Things that's been said
So much confusion
Go 'round in my head
And so may reasons that just don't make sense I try
To carry on but something's missing inside
I just wanna know if you were above me
Show me some kind a sign
Do you still hear me
When I call your name?
Will you be with me when I lose my way
When it gets hard let me know what to do
You always told me that you'd never go
I need u to show me that I'm not alone
Do you still hear me when I sing for you
Show me you do How do I start to
Make sense what's left
Still carry a memory of you in my head
And I'm just not ready to let you go yet
Oo no
But I know you're proud of
The way that I am
That you would want me to go on ahead
I give it all off see you again I try
To carry on but something's missing inside
I just need to know if you were above me
Show me some kind a sign
Do you still hear me
When I call your name?
Will you be with me when I lose my way
When it gets hard let me know what to do
You always told me that you'd never go
I need you to show me that I'm not alone
Do you still hear me when I sing for you
Show me you do
