Take Me On

Sick Boy

You've been out all night
That's right
Underneath your black umbrella
Pales around the lights so bright
Like little angels in the sky
But they don't fly
You walk by
As if the street
I'm hoping that our eyes might meet
Your heart's too blind to see me
That's the price to be lonely
If you want really love
You think that you're tough enough
Take me on
Take me on
You wanna be turned around
You wanna touch higher ground
For the love that you've been missin'
You think that you're not strong
Take me on
In a small cafe
All day
Staring in a cup of coffee

Time just slips away
Smoking your last cigarette
With no regrets
I say hello
You look away
But there's a smile behind your face
There's something more between us
But your hearts too scared to stay
There's a face in every window
A light goes out
Someone's alone
When they wake up in the morning
To another day
Another chance gone
If you want really love

You think that you're tough enough
Take me on
Take me on
You wanna be turned around
You wanna touch higher ground
For the love that you've been missin'
You think that you're not strong
Take me on
