

# Be The Revolution

## Love And Rockets

Walls coming down, walls going up  
See walls coming down and walls going up  
Rave on as the empires fall  
Corporations crash and kings are made to crawl  
The red flag comes down, the left in demise  
The blue flag goes up, the right on the rise  
A flaming cross and a swastika  
There's one way out and the road is on fire  
We can fly on wings of thought  
And start a revolution to take us higher  
Be the revolution - now  
Be the revolution - now  
What's going down, what's coming up  
What's going down here, and what's coming up  
There's no such thing as solid ground  
This given has been taken, and mass confusion found  
A short lived utopia  
The bird of peace forsaken and replaced by the warring hound  
Which direction is asylum in  
Well here's a map, a blindfold and a pin.  
Refugees of the transitional  
Now that we have nothing, we can begin  
To be the revolution - now  
Be the revolution - now (Come On) (Repeat)
