

# Another Life

## The Collective

This one's for those  
Those who fall in love, yeah  
This one's for who knows what it does, when  
You get your heart torn into pieces, cause  
The one you want  
Won't give you a reason, whyShe's out there playing with your heart  
Won't give it back, no  
You can't move on  
She comes, she goes  
That gives you more hope  
She sees you tryin'  
Just to get by it, and then she finally says noMaybe I was mistaken  
When your lips got closer to mine  
Thought that you were my angel  
But you slipped through my fingers tonight  
Baby I thought I'd seen a light  
Thought I had this right, everything alined  
Everything but you baby  
We really didn't make it this time,  
Maybe in Another LifeI guess you thought, we had a little fun and  
I guess, I was, never really number one but  
They say, you don't know whatcha missing, no  
Till that, day comes lose whatcha need it, noShe's out there playing with your heart  
Won't give it back, no  
You can't move on  
She comes, she goes  
That gives you more hope  
She sees you tryin'  
Just to get by it, and hate that she finally says noMaybe I was mistaken  
When your lips got closer to mine (got closer to mine)  
Thought that you were my angel (angel)  
But you slipped through my fingers tonight (but slipped through my fingers tonight)  
Baby I thought I'd seen a light  
Thought I had this right, everything alined (right through)  
Everything but you baby (baby)  
We really didn't make it this time,  
Maybe in Another LifeSometimes the one your loved can really make you go insane  
Sometimes the feeling right, but she can throw your heart awayMaybe I was mistaken  
When your lips got closer to mine

Thought that you were my angel (angel)  
But you slipped through my fingers tonight (but you slipped through my fingers tonight)  
Baby I thought I'd seen a light  
Told I had this right, everything alined (but a you, you, you, you)  
Everything but you baby, we didn't really make it this time  
Maybe in Another Life  
Baby, maybe in Another Life
