

Fairytale Lullaby

Bombay Bicycle Club

If you want to ride a rainbow come with me
And I will take you in a magic purple sea
And maybe we will find a thousand sugar fish
And when you eat them they can grant your every wish
And if you want your friends to come then bring them all along
If you want to catch a star then walk my way
And I will take you where the night is always day
You can follow me if you really try
And maybe we will find a rainbow, teach it to fly
And if you want your friends to come then bring them all along
Bow your head and let your eyelids close on
down
Where we're going you won't need to bring your frown
And you will find that all the things that I have said
Will come true when you are lying in your bed
And if you want your friends to come then bring them all along
