

Empty Space

Air Traffic

It's a void that I can't fill
An empty space, I can't replace
With anything at allThe lights are all burnt out
And smoke will drive the swimmers down
There's no one left at allYou've done enough, he's still alive
He's breathing on his own
I leave everything I haveYou've done enough, he's still alive
And he's breathing on his own
And he's breathing on his ownThere's chaos everywhere
And panic written on the air
That everyone is breathingAnd crushing light of day
The pain will never wash away
The fear will never leaveYou've done enough, he's still alive
And he's breathing on his own
I leave everything I haveYou've done enough, he's still alive
And he's breathing on his own
And he's breathing on his ownAnd God save our souls
How tables have turned and brokeOne more like this could be the end
They say they told us all along
But we were busy getting laidOne more like this will be the end
And we've known it all along
We've known it all along
