Next to You

Bell X1

It was part of our experiment
Went, you said go
And I went like a gooseberry on Noah's arkI watched them file in two by two
And I set sail without you
And we were carried on the flood of your tearsTime pulls a face when I'm next to you
Let's hope the wind changes
Time pulled a face when I'm next to you
Let's hope the wind changesNow I'm looking for dry land
As all this crying subsides
But I'm like Columbus in IndiaI'm a little all over the shop
Like those souvenirs from Knock
That come all the way from ChinaTime pulls a face when I'm next to you
Let's hope the wind changes
Time pulled a face when I'm next to you
Let's hope the wind changes'Cause we'd be stuck in this place for an age or two
I hope the wind changes
And the vacuum in space will draw me to you
I hope the wind changesI'm not over you, can I get back under?
