

Everytime You Need Me

Fragma

Everytime you need me
You know I will be there
You know I really care
Say you will, say you dare
An inner feeling comes around
Let it sparkle and let it shine
Let it lift you off the ground
Make it last, baby, make it mine
You are the sun that rises
You are the moon that lights the night
You are what paralyzes me
Everytime you need me
You know I will be there
You know I really care
Say you will, say you dare
Everytime you need me
You know I will be there
A love beyond compare
Say you will, say you care
Write my name into the sky
And keep the memories in your heart
Let the hours pass us by
I guess that this is a way to start
You are full of surprises
You are a fire burning bright
You are what mesmerizes me
Mesmerizes me
Everytime you need me
You know I will be there
You know I really care
Say you will, say you dare
Everytime you need me
You know I will be there
A love beyond compare
Say you will, say you care
Say you dare
Say you dare
No no, no no
Everytime you need me
You know I will be there
You know I really care
Say you will, say you dare
Everytime you need me
You know I will be there
A love beyond compare
Say you will, say you care
