

The Dawn

Magic Giant

Daylight breaks the dawn
Lights the world until it's gone
My baby breaks the mold
And when she leaves the world is cold Only lonely hearts
See the Sun's a shooting star
She left me in the dark
I'll trace this flame back to the spark Here comes the night
A blackout rollin
We're always holdin on
Chasing the light
A golden moment
I miss you like you're gone
And I'm ready for the dawn It's alright, this soon will pass
Like dust inside an hourglass
When twilight
Starts to burn
I hold my breath till she returns And here comes the night
A blackout rollin
We're always holdin on
Chasing the light
A golden moment
I miss you like you're gone We could share the floor
We could keep it warm
We could... wait it out
Try to end the war
Let's just close that door
We'll be painting And here comes the night
A blackout rollin
We're always holdin on
Chasing the light
A golden moment
I miss you like you're gone We're always holding on
And my dreams keep dragging on
Well I'm ready for the dawn
