

Black Lucia

Aztec Camera

People say that all I do is talk about you
But that's not true
I talk about you, think about you
Dream about you, can't live without you
It's just not true I can almost feel the sunshine
When black Lucia led the white parade
Let me always be the one who's left behind
When they desert you She's not your blue eyed girl, no diamond calling
She's a darkened sky, a crystal light
When the day runs dry and rain is falling
Black Lucia, lead me into night I never thought that I could never be the same
Until I met you
I thought my time had been arranged
Times have changed since you came
I miss you I can almost feel the sunshine
When black Lucia led the white parade
Let me always be the one who's left behind
When they desert you She's not your blue eyed girl, no diamond calling
She's a darkened sky, a crystal light
(A crystal light)
When the flags unfurl and tears are falling
Black Lucia, lead me into night She's not your blue eyed girl, no diamond calling
(No diamond calling)
She's a darkened sky, a crystal light
When the day runs dry and rain is falling
Black Lucia, lead me into night
