

Work to Make It Work

Robert Palmer

Push it along, work, work, work to make it work
Push it along, work, work, work to make it work
Push it along, work, work, work if you want to improve it
Push it along It's all there for you to feel it
Help your self to one that you can't deal with
Ain't no way that you could steal it
You misunderstand if you get greedy, ah push Work, work, work to make it work push it along
Work, work, work to make it work
Push it along, work, work, work to make it work
Push it along, work, work, work if you want to improve Don't confine your dreams to bed
You'll get scared if you get lazy
If you can't take enough to satisfy yourself
Then you'll go crazy Won't do no good thinking, you got to do it
So it don't come easy the first time
Practice makes perfect, you know that I'll try hard
Use it or lose it, you got to put your heart and soul into it, yeah Push it along, work, work, work to make it work
Push it along, work, work, work if you want to move it
Push it along, work to make it work
Push it along, work, work, work if you want to improve It's all there for you to feel it
Help your self to one that you can't deal with
Ain't no way that you could steal it
You misunderstand if you get greedy forget wishful thinking You can do it, you just need a push to make a start
If you don't succeed the first time
Try and try again, use it or lose it
You got to put your back into it Work, work, work to make it work
Push it along, work, work, work if you want to move it
Push it along, work, work, work to make it work
Push it along, work, work, work if you want to improve Work, work, work to make it work
Push it along, work, work, work if you want to move it
Push it along, work, work, work to make it work
Push it along, work, work, work if you want to improve
