Chaos

Ayreon

"I am the last human being alive. I am inside a machine called the Dream Sequencer on a deserted Mars colony. I have selected the program called "The Universal Migrator". This program creates a form of hypnosis which allows me to return to the very beginning of life itself. From the safety of the energy tank in which I lie, I travel all the way back to the period before The Big Bang where matter, energy and time itself all intermingle in the chaotic unformed vacuum of proto space."[Lana Lane (voice)]Dream Sequencer system online
I will now take you back to the time before the big bang and the birth of the very first soul called the Universal Migrator. However, system protocols require confirmation of risk factor. No user has ever preincarnated back this far before.
Are you sure you want to continue?
