

# Big Sky (ft. Tom G. Warrior)

## Probot

My world has died  
All gusts and leaves  
Your wondrous life  
And love have ceased And all you've touched  
Is dead and gone  
And night for night  
We're all alone Big sky throning over the tree  
You've left behind  
Through these tears lost  
By your forlorn only child  
Big sky throning over the tree  
You've left behind It hurts inside  
This silence new  
And yet i know  
The wind is you And all you've touched  
Is dead and gone  
And night for night  
We're all alone Big sky endless in your overwhelming pain  
Free at last into the light behind this eternal rain  
Big sky endless in your overwhelming pain You'll never pale  
You're never gone  
And all within  
I'm not alone Big sky
