Fingertips

Squeeze

You infiltrate my every hour, you bug me like a flea
I only wish I had the power to cut you free of me
Like some crustacean on my hull, you stick with me and make life dull
How can I make you see, Im in love with you?You typify the things to me that I no longer do
So get a grip and let me be and my life will improve
Leave me alone, get off my case, youre always there right in my face
But that is nothing new, Im so in love with youIts funny, how I loved you like the bottle at my lips
And when I fell off of my bike, my life had been eclipsed
By all the grief and disbelief there at your finger, at your fingertipsYou hover up, the very words I choose to throw away
I know some people never learn, so how can I complain?
You hiss at me and make me shake like some old grumpy rattlesnake
Lets think this through again, Im so in love with you
