Too Many Nights

Goldfinger

Too many nights with too many faces
I don't know where I've been
And too many days with too many places
I don't know who I am
Drive into the lights
The streets are like rain clouds
Drippin' into the night
Wheels keep on turnin'
The sky is still burnin'
Thunderclouds start a fight
Far away from home
Too many nights with too many faces
I don't know where I've been
And too many days with too many places
I don't know who I am
Rolling like hills
The sea is my homeland
Wishin' upon a car
And miles are minutes
And days are my cities
Recordin' my life on a map
Far away from home
Too many nights with too many faces
I don't know where I've been
And too many days with too many places
I don't know who I am
And the stars make a picture
And the stars are my Heaven to see
And the stars make a picture
And the stars are my Heaven to see
Too many nights with too many faces
I don't know where I've been
Too many nights with too many faces
I don't know where I've been
And too many days with too many places
I don't know who I am
I don't know who I am
Yeah, I don't know who I am
