

# Lay Low

Blake Shelton

Think I'll grab a bottle of Patron  
When I get off work on my way home  
Fill that hot tub full of bubble bath, kick back, relax  
Baby you and me and nothing on yeaGot a weekend coming just in time  
We're both needing what I've got in mind  
What I got in mind, that's me and you into me and you  
Can't wait to get you all alone yeaLay low, stay home and stay high  
Stay up, make love, all night  
I wanna run my fingers over every single inch of you  
Take my time, taking it slow  
Stay home, stay high and lay lowWe'll let our kisses do the talking girl  
Take each other to another world  
Feel like we're a million miles from here  
Somewhere out there, without going anywhere at allLay low, stay home and stay high, yea  
Stay up, make love, all night  
I wanna run my fingers over every single inch of you  
Take my time, taking it slow  
Stay home, stay high andLay low, stay home and stay high, yea  
Stay up, make love, all night  
I wanna run my fingers over every single inch of you  
Take my time, taking it slow  
Stay home, stay high and lay lowStay home, stay high and lay low
