My Fascination

Buck

You put the wag in my tail, you put the buzz in my beehive / and when I'm with you, it's enough to just be aliveI don't know nothing much but this much is true
My fascination is just another nail in the coffinYou put the skip in my step, you put the smile in my turnstile / I'd walk a city block or even a country mile
For you these things I'd do,this much is true
My fascination is just another nail in the coffinI'll be your umbrella if you'll be my fella and I'll keep you from the rain
Don't you worry, in a hurry there'll be sunshine once againWhen we're out and about,
We only have eyes for each other
You make me wanna shout and tell the whole world that I love youI know it's nothing new but this much is true
My fascination is just another nail in the coffinSha la la la...I know it's nothing new...
