Spheres

Ken Martin

The Highest Intelligence as
the explaining principal of existence
Visions and conclusions eager to
reveal some kind of significanceCritical realism, an imperfect reality
Knowledge, a human construction of theories
Moving the limits of wisdom
to edges of its disappearance
Explantions captured in schemes of time
Unfolded with human interference
The emptiness of ignorance
in a darkened void of mystery
Unanswered questions to be solved
by the presence of some deitySpheres!An endless galaxy of time zones,
dimensions, preserve the astral secrecy
The unity of time and space
a human philosophyA faithful reflection, an imperfect reality
Knowledge, a human construction of theoriesSpheres!
