

Lover's Spit (Broken Social Scene cover)

Feist

All these people drinking lover's spit
Sit around and clean their face with it
And listen to teeth to learn how to quit
Tied to a night they never met You know it's time
That we grow old and do some shit
I like it all that way
I like it all that way All these people drinking lover's spit
Swallowing words while giving head
They listen to teeth to learn how to quit
They take some hands and get used to it All these people drinking lover's spit
Sit around and clean their face with it
