

# Body Talk

## Jazz Profiles

Tonight you gotta trust me, girl  
It's all about actions, not about words  
Got plans for you, what you want me to  
Girl, I will do, you can pick and choose  
    You know that I'll lay it on  
On the back of my bike you'll be holding on  
    In the day take pictures in the sun  
    In the night let the city lights turn us on  
    We can take it back to the crib  
You can show me what you're working with  
    Open up and let me in  
    Let your body do the talking  
    Now that we're finally all alone  
I'm gonna give you something worth waiting for  
    So let's just hurry and get it on  
    Let your body do the talking  
    Let your body do the talking  
    Let your body talk  
    You can let your body talk  
    Let your body do the talking  
    Let your body talk  
    Just let your body talk  
    Come on  
    Wake up, it's a brand new day  
    And I've got plans to make you happy  
    Lace you with diamonds, a girl's best friend  
    Just watch me closely, I'll break you in  
    Come on, let's hit the club  
    No time for talking, just rave non-stop  
    As the tempo slows, it's time to leave  
As you look in my eye, you know what I need  
    We can take it back to the crib  
I can show you what I'm flexing with  
    Open up and let me in  
    Let your body do the talking  
    Now that we're finally all alone  
I can give you that something you've been waiting for  
    So let's just hurry and get it on  
    Let your body do the talking

Let your body do the talking  
Let your body talk  
You can let your body talk  
Let your body do the talking  
Let your body talk  
Just let your body talk  
Let your body do the talking  
Let your body talk  
You can let your body talk  
Let your body do the talking  
Let your body talk  
Just let your body talk  
So many things I'd like to do  
So many ways to make your body move  
Now you're home with me  
We can have a private party  
Come get down with me  
So come on  
Get down through the night  
It's alright, so come on  
Let your body do the talking  
Let your body talk  
You can let your body talk  
Let your body do the talking  
Let your body talk  
Just let your body talk  
Let your body do the talking  
Let your body talk  
You can let your body talk  
Let your body do the talking  
Let your body talk  
Just let your body talk  
Come on
