

# Come People

## Xavier Rudd & The United Nations

Come people, come now people  
Round and round we go again  
Spirit quest for enlightenment  
The rise and fall of things revealed  
Of sacredness and woundedness to heal  
Time to time she chimes in phrases from the internet  
Of planetary alignment and the  
Energetic push and pull we share  
Who will hide and who will seek?  
The suffering beneath your feet  
Has been neglected through the ages  
And I held that little girl she was a message in my dreaming  
I bring my hands and I must stay  
And I will graciously set you free  
Come people, come now people  
Come fire clean these people  
Come people, come now people Feel the touch of a gentle rain and  
We pull together when the earth she breaks  
So why are we so divided?  
Grandmother pull us out  
Grandmother can you tell me  
How we have been so mistaken?  
And I held that little girl she was  
A message in my dreaming  
I bring my hands and I must stay  
And I will graciously set you free  
Come people, come now people  
Come spirit through these people  
Come people, come now people  
And I believe we are one and we are sacred  
I will hold you close  
And I believe we are one and we are sacred  
I will hold you close
