Like Satellites

Over It

If you wanna fly, well it's not that absurd
If you want to cry we won't breathe a word
If you wanna lie down, well forget what you heard
'Cause we've all got some tables to turnHey, how long is in a long time?
Hey, you're feeling left behindNow that all I've got is a picture of then
Now that then got laid like a ghost to rest
Now the aliens have been cleared to land
Don't be alarmed if they cruise up to youLookin' for something to doSatellites spinning way outta orbit, livin' large for the moment
Life is short but it's built to go further than you know
Spinning way outta orbit, livin' large for the moment
Life is short but it takes its sweet time getting startedFar out, far out like satellites
Far out, far out like satellitesTo remind you it's not that absurd
If you want to cry we won't breathe a word
If you wanna lie down, well forget what you heard
'Cause we've all got some tables to turnSingin', hey, how long is in a long time?
Hey, if you're feeling left behindSatellites spinning way outta orbit, livin' large for the moment
Life is short but it's built to go further than you know
Spinning way outta orbit till they learn to control it
Life is short but it takes it's sweet time getting startedFar out, far out like satellites
Far out, far out like satellites
Far out, far out like satellites
Far out
