

Numbers

Frost

30 second paradise, saving up you pay the price
Line the eggs up in a line, come into my parlour now
Send the soldiers out to war, never seen our kind before
Coming under fire we're near alive don't stop it nowNumbers, we're numbers
Death is for the breathing
Life is for the leaving
Numbers, we're numbers
Hidden in the meaning
Seeing is believingNumbers need numbers feed numbers breed numbersLay your life out in a line, not the one
that you'd design
Time is moving faster, breathing getting harder now
You're a tumble of the dice, you're a living sacrifice
No shooting star you're just a falling satellite
Numbers, we're numbers
Death is for the breathing
Life is for the leaving
Numbers, we're numbers
Hidden in the meaning
Seeing is believingNumbers need numbers feed numbers breed numbers
We lit the fire, we lit the fire, we feed the fire, we need the fire
We lit the fire, we lit the fire, we feed the fire, we need the fire30 second paradise, giving up and telling lies
Line the eggs up in a line, come into my parlour now
Send the soldiers out to war, they have seen it all before
Coming under fire, no winners only losers.Numbers, we're numbers
Death is for the breathing
Life is for the leaving
Numbers, we're numbers
Hidden in the meaning
Seeing is believing
Numbers, we're numbers
Years you wasted dreaming
Waiting for the meaning
Numbers, we're numbers
Time that you were leaving
Seeing is believing
