Coalesce

33.3

So here we are
Covering without an atmosphere
The sound will dissipate
And gravity lifts us away from here
Away from hereNow we belong to the stars
With the ties that bind
I would never betray you
Nothing can keep us apart
All you've given me
I could never repay youI am alive
And everything I have, I give to you
Apart of me ordered in you world I see
Under the lights
Beneath the shadow of another view
Another viewNow we belong to the stars
With the ties that bind
I would never betray you
Nothing can keep us apart
All you've given me
I could never repay youWe are supplying the motion
We are supplying the oxygen
We are beginning to coalesce
And it is all
We were meant for thisCome and circle round my heart
You're the light that I follow in the dark, oh
Come, I'll make you a part of me
In a world beyond our dreamsNow we belong to the stars
With the ties that bind
I would never betray you
Nothing can keep us apart
All you've given me
I could never repay youNow we belong to the stars
With the ties that bind
I would never betray you
Nothing can keep us apart
All you've given me
I could never repay you
