Promises

Andain

Woke up today in casa blue
and helped her say pretending
we'll get better over time

the bars an' chians are all but new
ive got away's to under you

So please don't make more promises to me
and please don't take everything from me
and i will breath in every word to me
if you could please promise that to me

[Chorus]

Fell on my way to get it through
collect the days of bad things so its better over time
we'll never know the shades and hues
the ways and things to under you

So please don't make more promises to me
and please don't take everything from me
and i will breath in every word to me
if you could please promise that to me

[Chorus]

So please don't make more promises to me
and please don't take everything from me
and i will breath in every word to me
if you could please promise that to me
