You Don't Have To Leave (feat. Tryon)

Oliver Twizt

Maybe its the time your taking maybe its the face your making why putting that lipstick on
maybe its the way your shadding something bout the way you shaddin those brown eyes that turns me on.
I know i promised that id take ya out, now i just wana keep you here all to myself.
If ya wana dance we can put some records on and if ya wana party we can turn the lights down low.
If ya wana love me baby then love me baby we can paint the whole town red we dont have to leave this bed.
We dont we dont we dont we dont have to leave we dont we dont have to leave this bed.

I know we got reservations i know we got friends there waiting. Baby There good on there own.
Use your imagination all the places we could take it ooh if we just stay home. I know that we could shut the city down all the we got all right here right now
Course...
