Strolling Astronomer

Fu Manchu

Half moon closer to arriving through
More than a week ago
Bet ya can't ride the highway of size
Follow that, take it tooIn the valley of nine, landed right
Nothing left to do
Knee'n deep in the ground, understand
Yea, we'll drive it throughNo trace found
Unknown machine
No trace found
They cleared everythingFormation sighted by two, outside the range we've known
Since then I been to where, from the horizon it's shown
Slight collision repairs the seam, loss fuel at me
Engine running on 20 years, nothing like it seemsNo trace found
Unknown machine
No trace found
They cleared everythingAnd I've seen it with my eyes
Gonna be there one more time
Smoke dust up from the side, burned into my mind
And I see 'em with my eye
