Don't Ever Leave

Smile Empty Soul

Half inch fuse, ready to bite
Never said you're sorry cause you've always been right
Tell me I'm lame every Saturday night
Cause you drink too many and you want to fight
All my life, hold my breath
Wonder what trouble is coming next
Hold on tight through this mess
Sing that song cause you sing it best
La la la la
Hey...
I love it when you're spitting in my face
The way you scream when you're breaking all my things
I love the way you put me in my place
Don't ever leave me alone
Five cent heads, two bucks a pint
I was late with the rent but I never say die
Wet my bed, is it ever gonna dry?
Learned to take your shit with a big ass smile
All my life, hold my breath
Shrugging off visions of an early death
Hold on tight through this mess
Sing that song cause you sing it best

La la la la
Hey...
I love it when you're spitting in my face
The way you scream when you're breaking all my things
I love the way you put me in my place
Don't ever leave me alone
Hey...
I love it when you rip my heart away
When you hold it in my face so I can see
I love the way you bring to my knees
Don't ever leave me alone
Hold on to me
Hold on to me
Hold on to me
Hold on...
Hey...

I love it when you're spitting in my face
The way you scream when you're breaking all my things
I love the way you put me in my place
Don't ever leave me alone
Hey...
I love it when you rip my heart away
When you hold it in my face so I can see
I love the way you bring to my knees
Don't ever leave me alone
