Bright Lights

Slotface

Sticky eyes and all the devil breakfast.
I wipe the crumps from my plate
and ask what's next for us
there are about 5 people i can
seat this close to
still i dream of hands reaching out
to choke you
but im always coming back to you
always coming back to you
i show up to the show by myself
and i catch your eye
I think I'm getting stuck
i think im getting stuck i need you to yell at me so i know what to find
i need that bright light shining in my eyes take me away from the edge of the stage
i need that bright light shining in my eyes take me away from the edge of the stage
cause i'm crushed crushed crushed
cause i'm crushed crushed crushed
cold phone calls i think i know what i should say
its all coming back by now but never feels the same anyway
I think i've seen you round around around i think i've heard your name
its all coming back by now and i gunsack doesn't make it feel the same
i need that bright light shining in my eyes take me away from the edge of the stage
i need that bright light shining in my eyes take me away from the edge of the stage
cause i'm crushed crushed crushed
cause i'm crushed crushed crushed
cause i'm crushed crushed crushed
cause i'm crushed crushed crushed
i need that bright light shining in my eyes take me away from the edge of the stage
i need that bright light shining in my eyes take me away from the edge of the stage
i need that bright light shining in my eyes take me away from the edge of the stage
i need that bright light shining in my eyes take me away from the edge of the stage
cause i'm crushed crushed crushed
cause i'm crushed crushed
