

# Done Is Done

## Millencolin

You dont know what youre looking for  
Youre lost in the past  
You dont know who you are any more  
How long will it last?Well, it will last as long as youre gone  
In the future or past  
Theres a crusher ahead  
Make up your mind real fastSince yesterday I would let you go  
Are you happy if the answer is no?  
There is certainly time to make it so, yeahWhats done is done, you need to set your ways  
And that is you, you in your future days  
Mistakes and slams are made by everyone  
So, please accept whats done is doneYou dont know what you are any more  
Just know where youve been  
It doesnt matter how it all was before, let the present begin  
Big decision for a man in the daze to leave the haze, yeahWhats done is done, you need to set your ways  
And that is you, you in your future days  
Mistakes and slams are made by everyone  
So, please accept whats done is done, whats done is doneMovement is a sign of life, keep moving forward, life  
There is no going back from here in spite of all your fight  
Theres no point in blaming yourself for the wrongs youve done  
The game that is really numb, no need to be on the runWhats done is done, you need to set your ways  
And that is you, you in your future days  
Mistakes and slams are made by everyone  
So, please accept whats done is done  
Whats done is done, whats done is doneSo, please accept whats done is done  
Whats done is done, whats done is done  
So, please accept whats done is done  
Whats done is done
