

# I Saw It

## Barenaked Ladies

I saw, I saw it  
We all did  
It hurt, I heard it  
We all hid  
You took what we all hide  
We all hide from  
The hooks went right inside  
That's where they hung  
In the park by the playground  
I won't let you down  
In the park by the playground  
I won't let you  
You weighed and waited  
You kept steady  
You'd count and recount it  
Now you're ready  
You took what we all hide  
We all hide from  
The hooks went right inside  
Then the feeling numbs  
I won't let you down  
In the park by the playground  
From this point on I won't let you down  
In the park by the playground  
You think you deserve it  
And I won't stand and observe it  
From this point on  
We won't allow this, brother  
If we don't end this now  
There'll be others  
I won't let you down  
In the park by the playground  
From this point on I won't let you down  
In the park by the playground  
From this point on I won't let you down  
In the park by the playground  
From this point on I won't let you down  
In the park by the playground  
From this point on I won't let you down

In the park by the playground  
From this point on I won't let you down  
In the park by the playground  
I won't let you down  
In the park by the playground
