Atomic Firelight

Pagan's Mind

Finding the host of our needs
Recall the incense of you
Backfire, darkness prevail
Here we come back again
Cycles to reignI know there's a change in the future
Follow, now the world is in changes
(I am on the line)
Never vanish, we'll be here forever
Searching for the mystical energyTime existence, interruption
Indecision. Curse you! Fall!
Me immortal, you destruction
Force our mission, crucifyEndless, the Highest of power
Visions of dimensional changes
(I am on the line)
I am calling for the once lost horizon
Mission: channelizing souls in painFirelight
Black cold eyes
As we flow, yet to know
In our dreams, not what it seems
As we flow, seed of lifeEnding the life in this soil
Mission is now clarified
Starfire, crash into earth
In Flames you're surrounded, there's no turning backHeed now, all will discover
Silence, bringing the world to an end
Fearing changes: cent of our nature
Do not fear, all will unite as one...
One!Firelight
Black cold eyes
As we flow, yet to know
In our dreams, not what it seems
As we flow, seed of lifeTime existence, interruption
Indecision. Curse you! Fall!
Me immortal, you destruction
Force our mission, crucify
