

# Little Brother

## Hootie & The Blowfish

How you gonna say what you can and can't do  
Sitting in the crib, parked in front of the tube  
You're mad at the world like she owe you  
What you think opportunity's gonna come looking for you?  
Not a damn thing changed  
You're just another football waiting to be tossed in the game  
You're flossing again  
You talk a good game, but you're still trying hard to maintain  
Little brother, a ship can't sail without the water  
The world could be yours if you want her  
But you gotta be willing to go out and get it  
When you get it, keep winning  
Everyday you're out slinging that thing  
No worries or cares of what your mama may say  
Trying to get what you want in your life  
The cars, the clothes, the hos, the ice  
Not a damn thing changed  
You're still another football waiting to be tossed in the game  
You're flossing again  
You talk a good game but you're still struggling hard to maintain  
Little brother, a ship can't sail without the water, no  
The world could be yours if you want her  
But you gotta be willing to go out and get it  
When you get it, keep winning  
Little brother, no, a ship can't sail without the water  
The world could be yours if you want her  
But you gotta be willing to go out and get it  
When you get it, keep winning  
Everything you want could be yours  
If you were just to try  
All the troubles that you feel will fade away  
Like shooting stars across the sky  
All the dreams I hope you feel  
Soon, someday, shall be fulfilled  
Time is moving rapidly  
Don't let it pass you by, yeah  
Little brother, no, a ship can't sail without the water  
The world could be yours if you want her  
But you gotta be willing to go out and get it

When you get it, keep winning  
Little brother, no, a ship can't sail without the water  
The world could be yours if you want her  
But you gotta be willing to go out and get it  
When you get it, keep winning  
Little brother, no, a ship can't sail without the water  
The world could be yours if you want her  
But you gotta be willing to go out and get it  
When you get it, keep winning  
Little brother, no, a ship can't sail without the water
