My Selfish Gene

Catatonia

You, me and destiny
Guess that it was never meant to be
All you did was give me allergy
I'm not looking for your sympathyYou, me and destiny
I am courted by uncertainty
I've lost my will to live unselfishly
Altruism stinks of fallacyAnd my selfish gene
It fills up my spleen with bile
And all the while
I thought you gave a damnYou, me and destiny
Guess that it was never meant to be
All you needed was some courtesy
And I'm not waiting for an apologyMy selfish gene
It fills my spleen with bile
And all the while
I thought you gave a damn
Way back then I thought you gave a damn
