Closer

Sound the Alarm

May I have your attention
This information is hard to ignore
And it goes without question
That I make love to it to make you enjoyThese everyday complications
Are being further and further away
This is my invitation
You'll be the last to hear me sayWhat would it take to bring you closer, closer?
Something tells me, we need to get closer, closer
So come on take me, nothing lessSuch a strange situation
Crossing borders and boundaries sometimes
Then with the right combination
You need to run to feel alrightWhat would it take to bring you closer, closer?
Something tells me, we need to get closer, closer
So come on take me, nothing lessGet it out just for what it's worth
But first mark my words, I get shown good [Incomprehensible]
Finding out, I [Incomprehensible]since birth, talking circles
Over and over, over and overThat's what it takes to bring you closer, closer
Something tells me, we need to get closer, closer
So come on take me, nothing less
