Call Me

Golden Earring

From the Album: * Winter harvest When the time has come That your love is strong And you don't know what to do Then I'm miles away And you have to stay For your own What you must do Is call me I come running back to you Call me if you want my love so true When I think of you Girl that's what I do While I sit here all alone Then I see your lips Feel your finger tips And I hope That you will fall Call me

I come running back to you Call me If you want my love so true I only can't wait Thought it makes me so afraid To think that you're lonely It's the only thing you hate When the time has come That your love is strong And you don't know what to do Then I'm miles away And you have to stay On your own What you must do Is call me I come running back to you Call me Give you all my love so true
