

Back to Life (Stan Sb Remix)

3OH!3

There's a drum line in my heartbeat
I know exactly where it's from
They're turning off the street lamps
They say the day is almost done
There's a ringing in my ears now
I remember how it was
The feeling we had last night
And it won't stop now because
Everybody says hey, no
We don't wanna see this day go
If I ever had my say, so
We can make this go all night, night, night
'Cause if the party is dead
We can bring it back to life
Yeah, we can make it through the night
If you listen to the words that I say
'Cause if the party is dead
All we need is candle light
And a little bit of dynamite
Everybody will get out of our way
I got a song stuck in my head
I know exactly why it's there
There's a noise outside my bedroom
And I don't even care
If I ever said "go home"
Everybody here would say "hell no"
All we gotta do is just let go
We can make it through the night
'Cause if the party is dead
We can bring it back to life
Yeah, we can make it through the night
If you listen to the words that I say
'Cause if the party is dead
All we need is candle light
And a little bit of dynamite
Everybody will get out of our way
We can bring it back to life
Yeah, we can bring it back to life
'Cause I'm never gonna get these drums out of my head
And I'm never gonna get some sleep inside of my bed
And I'm sorry if good night is something I never said, said, said
'Cause if the party is dead
We can bring it back to life
Yeah, we can make it through the night
If you listen to the words that I say
'Cause if the party is dead
All we need is candle light
And a little bit of dynamite
Everybody will get out of our way
We can bring it back to life
Yeah, we can bring it back to life
