

Silence

Primal Fear

So cold is the night, it's silent without light
Since days they promised us to be home again
The death comes closer, the fear's coming nearer to us
There will be no tomorrow, do we go insane?
I have a picture of you with me Will there ever be an end
Will there ever be a last goodbye?
Please tell me there is hope
In silence till we die There is still longing in my eyes a different earth
I'm not impressed, it's just the silence
There must be something to believe in Will there ever be an end
Will there ever be a last goodbye?
Please tell me there is hope in silence till we die
In silence till we die Waiting, it's lately and there'll be a fight
Escape to a new world, what will be behind these lies There must be something to believe in Will there ever be
an end
Will there ever be a last goodbye?
Please tell me there is hope in silence till we die
Oh, in silence, do you believe it?
It's all in my heart, in silence till we die
