

Ghost

Sky Ferreira

I'm not irrational
I'm just no longer in the day dream
Of the delusion that once was help
between our seams Lately I've been between
being steady or a head case
What's become of us now
hanging our hearts in disgrace What did I do
to make you so cruel?
I've got this ache inside my heart
I know that it's you
What should I do now that
I know that we're doomed?
I loved you most
But now you're a ghost
I walk right through I remember when you said
that I was sick inside the head
I'm just halfway there
my common sense hanging by your thread A man on the outside
but a coward at heart
The taste of salt in my mouth
My voice silent, but my thoughts aren't What did I do
to make you so cruel?
I've got this ache inside my heart
I know that it's you
What should I do now that
I know that we're doomed?
I loved you most
But now you're a ghost
I walk right through What did I do
to make you so cruel?
I've got this ache inside my heart
I know that it's you
What should I do now that
I know that we're doomed?
I loved you most
But now you're a ghost
I walk right through
