# Watch How You Go

## Keane

The more we rush about, the less we do
I never saw you drift away
The more we spin around, the less we move
I never saw your spirit break
I wish that I could be your journeys end
But you were only passing through, yeah
Its not for me to try to stay your way
I wish you well in all you do
Just say you?ll watch how you go
Be gracious with your light
And may the years be kind now
Just say you?ll mind how you roam
The things that we have shared
Will soon be left behind now
I hope you know that you?re a graceful soul
You fill the room with hope and light
It?s only right that you should go your way

Cause nothing ever lasts that long
Just say you?ll watch how you go
Be gracious with your light
And may the years be kind now
Just say you?ll mind how you roam
The things that we have shared
Will soon be left behind now
Behind now
Behind now
Behind now
Just say you?ll watch how you go
Be gracious with your light
And may the years be kind now
Just say you?ll mind how you roam
The things that we have shared
Will soon be left behind now
The things that we have shared
Will still remain behind now
