# Robot Love

## Urban Cone

Even when the sun is down down down down
We're working hard when you're asleep
Everyday is all the same same same same
But that's the life for you and meOh this is robot love, robot love
Oh this is robot love robot love
You and me we will last forever
Only need electricity
We can leave, we can do whatever
Only need electricityI don't want to wait forever ever ever ever
I'd do anything for you
I wish that we were free whenever never never never
But that's just life for you and meOh this is robot love robot love
Oh this is robot love robot love
You and me we will last forever
Only need electricity
We can leave, we can do whatever
Only need electricityIt's all about tonight
It's all about tonight
It's all about tonight
It's all about tonight
It's all about tonight
It's all about tonight
It's all about tonight
It's all about tonight
It's all about tonight
It's all about tonightRobot love, robot loveYou and me wouldn't last forever
Robot love robot love
Only need electricity
Robot love robot love
We can do whatever
Robot love robot love
Only need eletricity
Robot love robot love
