

Default Judgement

Fear Factory

Discrimination your intention to scar me

Discrimination your a suspect penalty

I suffer

Spiteful resolution by your sentence we must fall

Spiteful resolution bitter thoughts destroy us all

We suffer, suffer

Your final judgement stands made by your will

I never had a chance, I never will

By your default judgement everyone has suffered

Your pointless judgement caused everyone to

Suffer, suffer

Your final judgement stands made by your will

I never had a chance, I never will

Day in which God judged humankind

Day in which God judged humankind

Day in which God judged humankind

Day in which God judged humankind

Day in which God judged humankind

Day in which God judged humankind

Mankind, mankind

Your final judgement stands made by your will

I never had a chance, I never will

Never, never

Never, never

Never, never

Never, never
