

# Super Symmetry

## The Capsules

Seeking our path inbetween  
While the world spins at twenty degrees  
Feeling like half of myself  
All alone without somebody else  
Forces constrict and unwind  
Falling in and out of a line We're all moving faster and faster and faster  
We're all moving faster and faster and faster  
We're all moving faster and faster and faster  
We're all moving faster and faster and faster Atoms collapse and collide  
Like the time that we met you and I  
What is the space inbetween?  
To explain our super symmetry  
Systems constrict and unwind  
Falling in and out of a line We're all moving faster and faster and faster  
We're all moving faster and faster and faster  
We're all moving faster and faster and faster  
We're all moving faster and faster and faster  
We're all moving faster and faster and faster Systems conform and define  
All the pathways between you and I  
Forces constrict and unwind  
Falling in and out of a line We're all moving faster and faster and faster
