Chemical Blood

Fightstar

Just give me new skin
With mechanical-like arms
And X-ray eyes
And ears to hear your needs
Give me chemical blood
So I can run faster than the speed
Of light that shines to bleach the color
Of the silver of your honors
Give me your strength so I can go further
And breathe under water with ease
I am a ghost in the shell
There's nothing left of me
We will always be in these machines
Give me chemical blood

So I can run faster than the speed
Of light that shines to bleach the color
Of the silver of your honors
Give me your strength so I can go further
And breathe under water with ease
I need a body that I can charge through the walls
Only I can control
Hold out your swords and arms
All you do is hang your head high
Just give me your strength so I can go further
And breathe underwater with ease
I need a body that I can charge through the walls
Only I can control
