Unified

Biohazard

a word to the wise, everything seems so contrived I feel paralyzed, like my spirit has died On the inside, looking for a brother to confide Keep you lies to the side, be like "do or die" Only mother fuckers who know the real deal DOWN FOR LIFE with our people, yes that shit is real You pick the wrong side, "you that shit is suicide" Throw your fist up, gimme some more Me and my brothers are unified Are you raw? Hardcore, are you ready for war? To our people who are real, we'll fight till we die, We are the crew, unified Everybody's gonna do what they got to do To die for the crew, always down to see each other through When we say that we're down, we're not fuckin' around! Representing to the fullest with my feet on the ground You'll never say it to my face, you don't wanna get hit To the jealous motherfuckers who try to talk shit We are the crew,?we are unified If you aint with us, you're against us, ?ask those who have died Chorus All for one, one for all, unite and conquer, heed the call Can you feel it? Deep inside, unified It's like I wanna unify us all, and tear down the walls With our army of four, add a illion more I wanna blow up the white house, and the shopping malls And bow down a kneel before the power and might Fuck religion all the world will worship hardcore When we move the crowd, I feel something inside And witness our tribal ceremony tonight You can never deny, we are unified Chorus
