

I Knew You That Way

Luke Bryan

The secret way long shadows bleed into the night
The desperate way leaves in the fall hold colors tight
The way the thunder know the taste of summer rain
I knew you that way
The way cool mountain waters dance down to the sea
Bound by something strong but still so wild and free
It gives into the passion of the path it takes
I knew you that way
I held you closer than I had a right to hold
But the only thing that time can take away
Is I knew you that way
The way that skin on skin can start a crazy fire

But no one sees but burns all night long with desire
The quiet ease that makes a lovin' woman stay
I knew you that way
I held you closer than I had the right to hold
But the only thing that time can take away
Is I knew you that way
The holy way that love knows it should never end
The sacred way that stars got sailors home again
Like tear drops know the words to amazing grace
I knew you that way
I knew you that way
I knew you that way
I knew you that way
