

# Bodyguard

## Bee Gees

It hurts me when you cry  
When you feel the love is gone  
Don't give up on us when you got so much to believe in  
So I beg you please stay yeah Danger in the night  
Flame that never dies  
In a world of lonely faces you need someone to survive  
Love like yours should never live alone Let me be your bodyguard, I can be useful to you  
We can just get excited, stop before we go too far  
Let me be your bodyguard, living in my protection  
We can just get ignited, lost inside  
It's only you and me There's things you shouldn't do  
You lose your self-control  
Should the eyes of a perfect stranger take you down to a new sensation  
Just turn back to me Don't wait till it's gone  
Don't go where you don't belong  
In a world of pain and sorrow, every wish is your command  
A heart like yours should always find a home I know the signs and I'm telling you  
You're living on borrowed time  
But a heart needs love like a flower needs rain  
Like I'm making you mine Let me be your bodyguard, I can be useful to you  
We can just get excited, stop before we go too far  
Let me be your bodyguard, living in my protection  
We can just get ignited What we had never known all our lives  
I pray it's not too late  
I would die by your side my love  
I'm the life that you save In this world of pain and sorrow, every wish is your command  
A heart like yours should never live alone, yeah I used to dream of a special one  
And now I feel it's coming true  
But I couldn't let go, I'm a jealous guy  
What you're putting me through Let me be your bodyguard, I can be useful to you  
We can just get excited, stop before we go too far  
Let me be your bodyguard, living in my protection  
We can just get ignited, stop before we go too far Stop before we go too far, my love, my life  
Stop before we go too far Let me be your bodyguard, I can be useful to you  
We can just get excited, stop before we go too far  
Let me be your bodyguard, living in my protection  
We can just get ignited, stop before we go too far Let me be your bodyguard, I can be useful to you  
We can just get excited, stop before we go too far
